Education

King Mongkut's Institute of Technology
Ladkrabang (KMITL)

B.S. Information Technology
(Software Development)

GPA: 2.93 | Expected Graduation: 2026

Skills

Frontend

- HTML, CSS, TypeScript, React, Next.js, Tailwind CSS

Backend

- Node.js, Python, Django, PHP, REST API, Prisma

Database Management

- PostgreSQL, MySQL, MongoDB (NoSQL), SQL

Systems & Analysis

- Requirement Gathering & Analysis, UML Modeling, Database Design (ERD), Workflow Design

Tools & DevOps

- Git / GitHub, Docker, Postman, AWS (Basic EC2, S3), DBEaver, pgAdmin

About Me

Final-year Information Technology student at KMITL focusing on Software Development and System Analysis. Experienced in developing web applications from requirement analysis to full-stack implementation. Passionate about designing practical systems and database models (ERD) while continuously learning new technologies to build efficient solutions.

Projects

Budget Preparation Support System

Aug 2025 — Present

Full-stack Developer & System Analyst

- **Digitalized** a manual budgeting workflow into a centralized web platform, implementing a real-time dashboard to streamline income and expense tracking.
- **Analyzed and designed** system workflows, ERD models, and database schemas to ensure data integrity for financial reporting.
- **Engineered** the system via BFF architecture with Next.js, Node.js, Tailwind CSS, Odoo, and PostgreSQL.

Game-Vault | Full-stack Developer

Jan 2025 — May 2025

- **Designed** a game browsing platform featuring detailed game pages, user authentication, and a dynamic commenting system.
- **Integrated** external REST APIs (RAWG) to fetch and display comprehensive game data, providing users with up-to-date information.
- **Engineered** the solution using Next.js, Node.js, TypeScript, Tailwind CSS, Prisma, and PostgreSQL.

Accounting and Store Management System

Aug 2024 — Dec 2024

Backend Developer & System Analyst

- **Analyzed** system requirements and designed database schemas (ERD) for a custom inventory and employee management platform.
- **Implemented** core backend logic to track real-time stock levels and securely manage employee accounts.
- **Developed** a backend using Python, Django, and PostgreSQL.

OhYummy | Web Developer

Jan 2024 — May 2024

- **Built** a full-stack restaurant platform featuring interactive menu browsing, table reservations, and a seamless ordering system.
- **Engineered** a real-time order tracking workflow to improve customer satisfaction and optimize restaurant operations.
- **Developed** the user interface with HTML and CSS, and implemented server-side logic using PHP.
